

Stereo Hi-Fi Balun (500028)

Frequently Asked Questions (FAQ)

1. **Does the Stereo Hi-Fi Balun (500028) work with the sub-woofer (RCA) output on an AV receiver?** Yes. The Stereo Hi-Fi Balun (500028) works with powered subwoofer speakers, providing that the baluns are connected to the dedicated subwoofer (single RCA) jacks on the AV source and powered subwoofer. The baluns must only be connected to the subwoofer RCA jacks, not to the spring-loaded loudspeaker terminals. Since the 500028 has two RCA ports, one of them will be unused.
