

VGA 4x1 Switcher (500160, 500161)

Frequently Asked Questions (FAQ)

1. **Is the 500160 cascadable with other MuxLab products?** Yes. It is cascadable with the VGA 1x4 Hub (500150). The following diagram illustrates.

2. **Is the 500160 cascadable with other 500160?** Yes. However, when using IR control, if the switchers are next to each other, the IR will affect both switchers simultaneously and this may be an issue.
3. **Can the 500160 be used as a 1x4 switcher instead of a 4x1 switcher?** Yes. The 500160 may be used as a 1x4 switcher to connect one (1) source to one of four (4) different displays. For example, it could also be used in the following configuration: 4 sources-----> 4x 500141----->4x1----->1x4-----> 4x 500142-----> 4 displays.
4. **Is the 500160 compatible with the 500146 and 500147?** No.
