Allow the software to detect your DHCP address automatically!

Setup wizard

Step 1 of 3 : Important system information

A DHCP server was found at the address 192.168.168.2

· Note 1: By default all devices are already shipped with DHCP enabled

· Note 2: Devices with DHCP disabled may not be detected by the software

NEXT

Optional step to set up a software user name and password

Setup wizard

Step 2 of 3 : Login and Password Setup

This step is optional. Click 'Skip' to move to the next step
