

MuxLab Job Opportunity

Position: Senior Software Developer

MuxLab Inc (Montreal, Canada), a leading designer and manufacturer of connectivity solutions for the Pro AV, Broadcast, Audio-Video and Structured Cabling market, is actively seeking a candidate for the position of Full-Stack Developer.

You will be part of the MuxLab R&D team to develop hybrid mobile & desktop applications, as well as APIs and server-side applications in the context of our audio / video solutions.

Responsibilities

- Project conception and development, carrying the project through the entire SDLC
- Improve and update current applications
- Improve and maintain existing software components
- Perform test units, verification and validation of the product developed
- Document the projects according to Muxlab's standards (protocols, architecture, technical specifications, etc.)

Required Skills and Experience

- 4+ years work experience with below technologies
- Bachelor in computer science or equivalent experience
- Experienced in **Angular** development
- AngularJS experience is an asset
- Experienced in **PHP, NodeJS** development
- Experience developing APIs and server-side applications
- Good knowledge of **MySQL**
- Deep knowledge of **HTML & CSS**
- Ability to write effective and reusable code according to best practices
- Must be a dynamic, autonomous, and team-oriented individual.

Salary and benefits package: Negotiable. Based on experience and ability.

To apply to the above position, please e-mail your resumé to careers@muxlab.com.
