MuxLab launches new HDMI/LAN Extender Kit

Go the Distance via Cat5e/6 Cable

MONTREAL, CANADA — MuxLab Inc. is pleased to announce the launch of the newest addition to its HDMI family; the HDMI/LAN Extender Kit. This kit allows HDMI equipment to be connected up to 330 ft (100 m) @ 1080p Deep Color via one Cat 5e/6 unshielded twisted pair cable in a point-to-point configuration. But it doesn't stop there! The kit supports one Ethernet connection and comes with one Transmitter and one Receiver, as well as an IR Emitter and IR Sensor for remote control applications.

Ideal for applications such as commercial and residential AV systems, classroom projector systems, digital signage, and boardroom systems, this kit is surely a versatile product with endless possibilities for use.

"We are really looking forward to seeing what this product does in the market and we cannot wait for the positive results" said Marc Bohbot, MuxLab's Director of R&D. "This product was developed thanks to a specific demand so we are confident it will sell well"

The HDMI/LAN Extender Kit, model number 500453, works with devices such as DVD, plasma, projectors, monitors, TV, PC, laptops, and servers supporting HDMI. The unit comes equipped with one HDMI receptacle, one RJ45S for Link, two RJ45S for LAN, and 3.5mm jacks for the IR emitter and IR sensor.

About MuxLab

MuxLab Inc. is a leading designer and manufacturer of connectivity solutions that allow CCTV and Audio-Video equipment to be connected via cost-efficient Cat5e/6 copper twisted pair in the structured cabling environment. For over 25 years, the MuxLab brand has been synonymous with quality, performance and reliability. MuxLab solutions streamline cabling by reducing material, space and installation costs. Even after installation, MuxLab products help save time and money by facilitating moves, adds, and changes.
